User guidance

Wellness for you and your facilities.
GAT – the perfect POS, access and billing system.

How you can move more with less.

Refreshingly simple: one system, numerous possibilities.

Just imagine: you could have all entry, access, locker and billing systems under one roof. A good idea? We have the right solution for you: simple, safe, cashless and tailored to your requirements. From car park access to check-out, one chip controls everything. And that's not all: control of turnstiles or barriers, cash tills, lockers, changing cubicles, showers, drink dispensers, solarium or massage area, restaurants, specific access authorisations and electronic time recording for your staff and much more.

This makes it easier to analyse your Company, increase the attractiveness of your products and services as well as efficiency and exploit potential savings. And you move more as a result. This also benefits your turnover, because "cashless payment" has shown to increase sales by up to 40%.

We have over 30 years' experience as a technology leader in the field of electronic management systems offering the highest standards of security and intelligent eco-friendly systems that make the management and organisation of your facilities much more profitable and easier. This will not only benefit your visitors and staff, but also you – that's for sure.

Leisure facility management

1 Turnstile with integrated access reader
2 Slim card reader for doors
3 Wristband return system
4 Card reader for doors offline
5 Entry terminal for doors or turnstiles
6 Fingerprint terminal

A profitable solution.
The complete access system for wellness and leisure facilities.

How would you like to increase your turnover with a complete system, reduce staff expenditure and increase customer satisfaction?

Our POS, access and billing system will allow you to do just that. For example, entry billing or management of time, value and point cards. This allows you to gather extensive statistics or organise access authorisations and controls. The chip acts as a universal guest entry card. For example, integrated in a wristband, for the convenience of guests while using the pool. Whether in thermal baths, wellness facilities, bars or hotels – the system controls turnstiles and doors, records times and provides you and your staff with a better overview.

Your products and services are used more spontaneously – which boosts your turnover. Ultimately, better controls offer greater security for everyone.

How to make sales easier, more reliable and more efficient.
The GANTNER POS system.

Do you want to speed up your processes and make them more secure?

Our POS Action system has been specially developed for touch screen tills. Visitor numbers in the facility and in each zone are displayed on the main screen. The customer screen displays all consumptions and offers visitors more security.

Further advantages: Operation is simple. The system enables staff to sell tickets and vouchers more quickly, cancellations are logged in detail. This provides valuable statistics about, for example, different tariff models. Fast sales processing and convenience increase customer and staff satisfaction.

Be on the safe side.
The GANTNER patented electronic locking system.

Keys, coins and padlocks? Today, these systems are organisation-intensive, inconvenient and not secure.

With our patented electronic locking system, security is no longer an issue. Online systems or battery-operated locks, lockers, safes and cubicles can be opened and closed easily with one chip – simultaneously in several areas within the facility. The centrally controlled system provides a clear overview of the level of utilisation without having to issue and manage keys. Long-term locker, cubicle and safe hire is efficient and profitable. For additional security, lockers are protected by an alarm in the event of tampering.

Visitors can enjoy the convenience of a secure electronic locking system and fully enjoy the use of the facilities in the knowledge that their property is safe.

4 Information terminal, large

More service, more turnover.
Cashless payment with the GAT system.

Most visitors do not like to leave their bags unattended. Even the best wellness facility or reputable hotel is not fully protected against theft. This can ruin the wellness experience.

With the GAT system, guests can use all the facilities without having to pay in cash, without worrying and trouble-free. Billing takes place easily and securely at the end of the stay. Guests can also pay for pool use and room service in this way. The chip is not only a key and the core of a perfect organisation system, it is also a modern and secure means of payment. It positively influences the spending behaviour of guests. Studies show that cashless payment can increase spending by up to 40%. This makes additional services such as restaurants, solarium, sauna, massages, vending machine snacks or products in your shop particularly attractive.
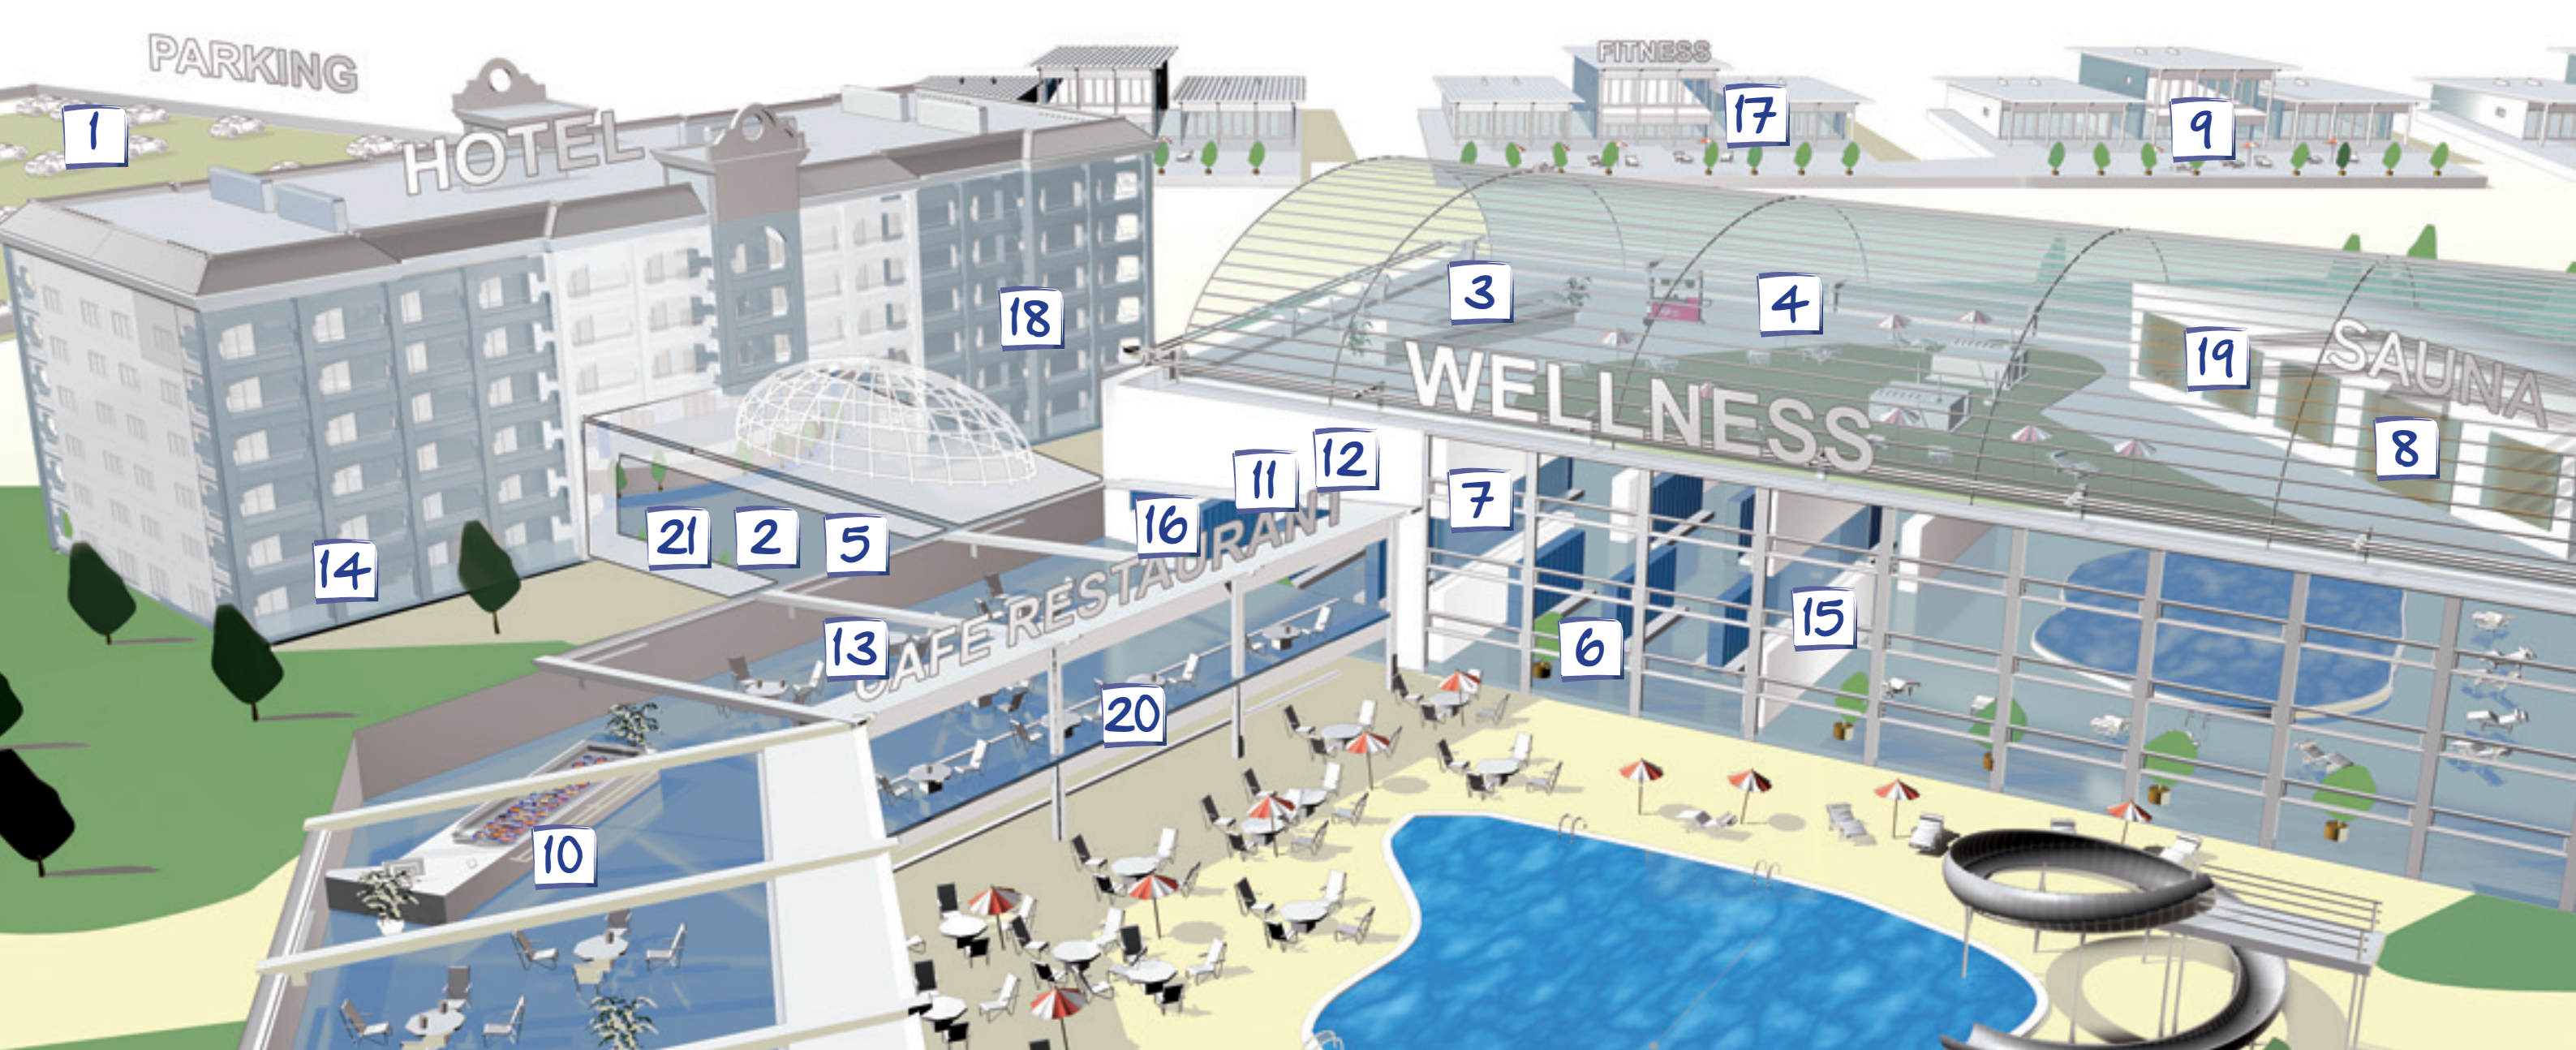

For you, this means: higher turnover, more security and a quick and complete overview of your takings.

1 Time control terminal

2 Top-up terminal

3 Pre-pay machine

4 Shower terminal, solarium terminal, control terminal for whirlpools

5 Drinks dispenser

Sophisticated individual solutions.
One card for everything.

1 | Parking
Guest cards can also open car park barriers.

2 | Main entrance
Staff can also use their ID card to gain access via the main entrance outside opening hours. Every entry is logged.

3 | Check-out area
Various tariff models, vouchers, happy hours... A GANTNER system makes everything easy.

4 | Dispenser
To get to the pool quicker: the chip wristband is issued directly from the dispenser.

5 | Turnstile
Move the wristband or card across the reader to pass through the turnstile.

6 | Changing area
The entry card (or band) is also a locker key.

7 | Information terminal
Forgotten your locker number? No problem. Simply go to the information terminal – it also shows the time and cash credit on the chip.

8 | Wellness, sauna
Access authorisation to certain areas is programmed on the chip after paying the admission fee. Just enter and have fun!

9 | Solarium
Move the chip across the reader and select the required tanning time. The charge is booked on the chip and the machine starts automatically.

10 | Restaurant, bars
Wallets and bathing trunks don't go together. This is why it is so convenient to be able to pay with the chip wristband. A spend limit can be programmed for children.

11 | Vending machines
Payments for vending machine drinks and snacks can be made without cash with the card or wristband.

12 | Top-up terminal
Central top-up point for chip cards. Cash is stored securely in the top-up machine's safe.

13 | Canteen
Payments in the canteen can be made without cash and are quick and hygienic (no coins or notes).

14 | Time recording
Working hours are recorded quickly and efficiently. Information regarding individual members of staff is also possible (HR Infocenter).

15 | Locking system
Electronic lockers are locked by the chip, no additional keys are needed.

16 | Filing cabinets
No separate keys are necessary for filing cabinets, all openings are logged via the chip number in the electronic lock.

17 | Beauty
The atmosphere should be calm and relaxing. That is why access is only permitted to those having treatment.

18 | Internal doors
Offices, warehouses, workrooms... Employees require access to areas prohibited to guests. This is simple with a GANTNER system.

19 | Showers
Special showers can sometimes cost more – or their use can be controlled. This is also simple with GANTNER devices.

20 | Pre-pay machine
Stayed longer, because it was so nice? Or you had another drink? Prior to leaving, unpaid bills can be settled here. Credits are also returned.

21 | Return system
Once the account on the chip has been settled and the locker is emptied, the return system takes back the wristband and the turnstile is released. Goodbye!

GAT Info 6100

A small, elegant terminal for displaying visitor information. Just hold the chip bracelet to the luminous point and the display will show all relevant information, e.g. locker number, remaining time and cash credit. Your guests will feel well taken care of!
